Sequence 10, Application US/09396937

Patent No. 6645500

GENERAL INFORMATION:

APPLICANT: M&E Biotech A/S

APPLICANT: HALNIER, Torben

TITLE OF INVENTION: Activity

TITLE OF INVENTION: Activity

FILE REPRENCE: 22021 PC. 1

CURRENT APPLICATION NUMBER: US/09/396,937

CURRENT FILING DATE: 1999-09-15

NUMBER OF SEQ ID NOS: 35

SOFTWARE: Patentin Ver. 2.1

SEQ ID NO 10

LENGTH: 173
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  22 AHLT-----INAASIPSGSHKVTL---SSWYHDR-GWAKISNMTLSNGKLRVNQDGFYY
